

All New Policy Draft
RISE Charter School ~ Policy 2336
School Artificial Intelligence Use

Scope

This policy covers any generative Artificial Intelligence tool (i.e. the specific type of AI that can create new data/content like that which humans can produce), whether standalone products e.g. ChatGPT, or integrated into productivity suites, e.g., Microsoft 365 and Google Workspace. This policy relates to all data/content creation, including text, artwork, graphics, video and audio.

This policy will be reviewed at least once each academic year and updated to reflect advancements in technology and best practice.

Bullying/Harassment

Using AI tools to manipulate media to impersonate others for bullying, harassment, or any form of intimidation is strictly prohibited. All users are expected to use AI tools solely for educational purposes.

Use of AI in Classrooms

Staff should not copy from any source, including generative AI, without documentation. Students are not permitted to submit AI-generated work as their original work and should receive permission to use AI for assignments. Staff and students will be taught how to properly cite or acknowledge the use of AI where applicable. Teachers will be clear about when and how AI tools may be used to complete assignments and restructure assignments to reduce opportunities for plagiarism by requiring personal context, original arguments, or original data collection. Existing procedures related to potential violations of the RISE Academic Honesty policy will continue to be applied.

Privacy

The use of AI is required to adhere to state and federal privacy laws. The School will not use AI in ways that compromise teacher or student privacy or lead to unauthorized data collection, as this violates privacy laws and ethical principles.
